Colonial English.

A Glossary
of Australian, Anglo-Indian, Pidgin
English, West Indian, and South African
Words.

By

Karl Lentzner, Ph. D.

Preis 7 *M* 50 *S*.

A long residence in New South Wales and Victoria enables the Author to say that what is here given of the rich and racy slang of Australia is correct. These eccentric forms of expression are, for the most part, of modern origin, invented because they were absolutely needed, or because they expressed some idea more ingeniously, sententiously, and amusingly than others had done.

Arabic Chrestomathy.

In Hebrew Characters.

With a Glossary.

Edited by

Hartwig Hirschfeld, Ph. D.

Arabic literature in Hebrew characters has gradually developed a certain independence. For many years it was necessary to employ translations in the study of the same, until some authors, following the example set by S. Munk, published a number of the most important works in the Arabic original. Many of these writings, however, lie still unprinted in the great libraries. To publish them all, or part of them, would entail great difficulty. Munk had intended publishing a *Chrestomathie arabe-rabbinique*, but instead of this he edited the *Paläat el-Häira* (More Nebuchim) of Maimonides, without carrying out his original project. The Editor hopes to meet a long-felt want by the above publication.

A Hindí Grammar.

By the Rev. S. H. Kellogg D. D.

Since this Grammar was first published the Hindí translation of the Sanskrit drama of Shakuntalá, by Rájá Lachhman Sinh, has taken

the place of the *Prem Ságar* in the Civil Service Examinations, and in the new edition of the Grammar the former work has been largely substituted for the latter as a source of illustration. A new chapter has been added on the Dialects of Hindí, and the Maithili, Mágadhi and Naipáli have been added to the dialects formerly presented, making the number exhibited in the revised edition to be fourteen. The section on the so-called Nominal Verbs, a subject but slightly treated in the former edition, has been greatly enlarged, and a large amount of other new matter has been added which cannot be mentioned in detail.

It is believed that the present edition, with its various improvements on the original Grammar, will be found to be deserving of the place which that work has for some time held among Grammars of the languages of India.

[Trübner's Simplified grammars.]

The Khassi language is a member of that heterogeneous group, sometimes called the Sub-Himalayan, of which so little is known, but the importance which the Khassi and Jaintia Hills have of late years acquired, both as a frontier district and a centre of administration, justifies the appearance of a complete and somewhat exhaustive Grammar of the language of by far the most numerous and powerful of the north-east frontier tribes. The Khassis and Taintias occupy a strip of mountain district between 70 and 90 miles in breadth, in the centre of the province of Assam. The number of people speaking the language may be roughly estimated at 250,000.
