**THE BRITISH MOSS-FLORA.** By R. BRAITHWAITE, M.D., F.L.S., etc. [1880]-1905.

"The three volumes of Dr. Braithwaite's book are illustrated by 128 pages of plates, giving figures of every moss described, with enlarged designs of parts of the various species. Every one of these plates has been engraved from the drawings of the author himself, and together constitute a remarkable monument of his skill and industry. Indeed, the illustrations may be regarded as perhaps the most distinctive feature of the work. In some cases a whole page is devoted to a single species, as *Schistostega*, or to two species, as in the strange genus *Buxbaumia*; but generally four or more plants are dealt with in a single plate. So far as we have compared the figures of our author with nature, we have found his drawings accurate, and the magnified parts very valuable for the purposes of identification. . . .
