

the form of a gradebuilder or an overhead loader, for earth-moving or soil shifting operations (Fig. 8).

In road haulage the tractor has proved to be a machine which is both reliable and economical in operation, and which is particularly suitable for short-haul traffic (within a radius of about 30 km).

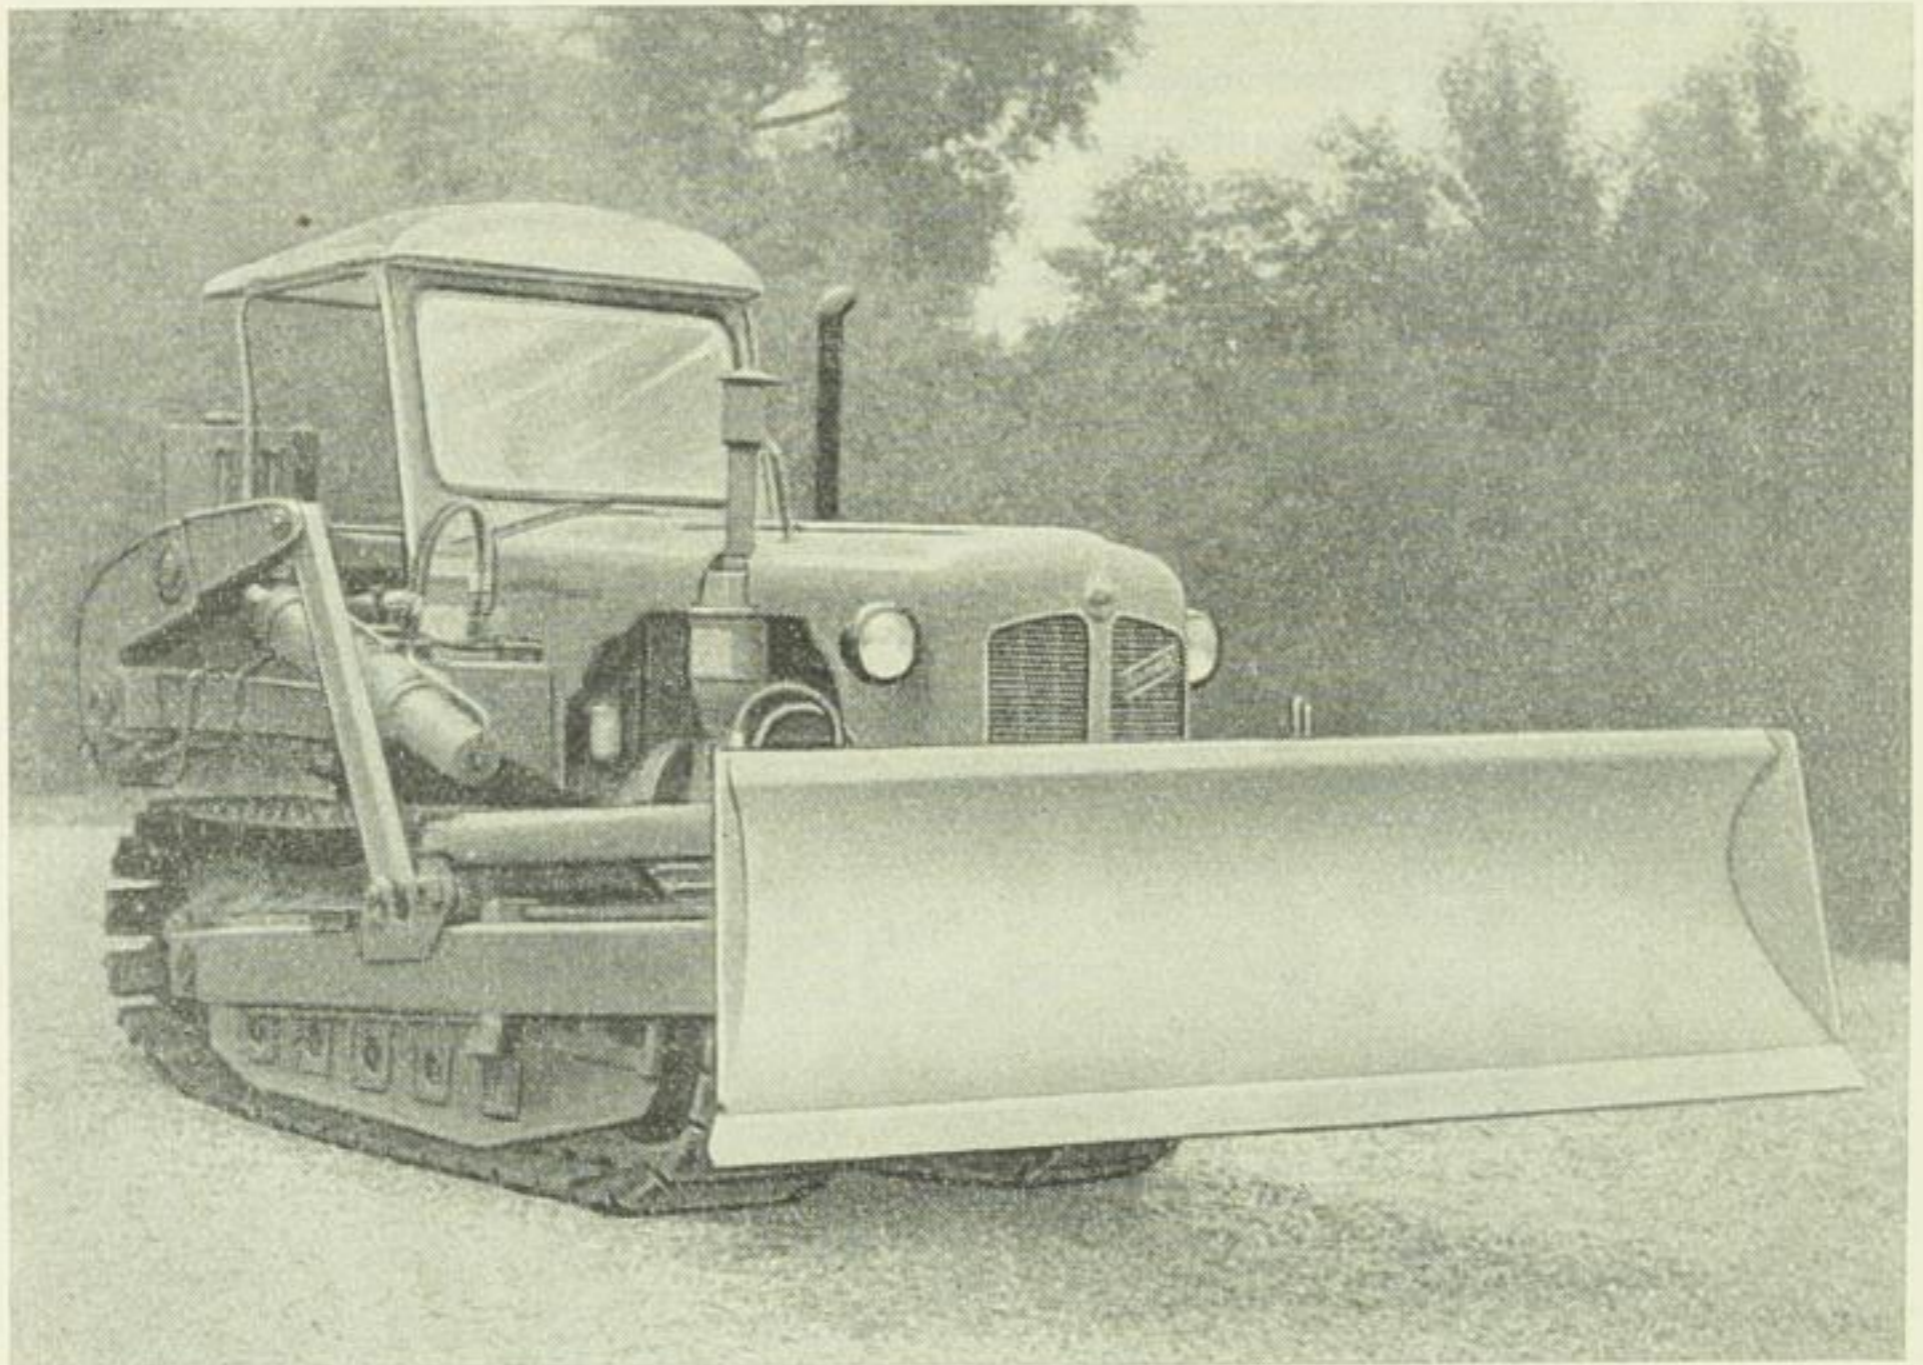

Fig. 8. Crawler tractor with attached pusher-blade ready for use in the construction industry (Type: KT 50 / output up to 70 m³/h at a travelling distance of 10 m / speed 3.0 to 6.6 km/h.)
