HANCOCK AND CO. solicit attention to their very superior manufactures in GUTTA PERCHA, &c., which they continue to supply on their usual advantageous terms, having secured an unlimited quantity of the raw material previously to the late speculations in the market. As LICENSEES UNDER THE FIRST PATENT granted for the manufacture of Gutta Percha, they further beg to inform their Correspondents that with regard to any dealings had with H. and Co. for goods manufactured by them under their License, they are ready to hold their customers harmless and indemnified from any proceedings which may be threatened to be taken against them, by ANY PARTIES assuming to be Patentees under subsequent Patents; the only stipulation on the part of H. and Co. being that they and their Solicitor shall have the conduct of any defence that may be considered necessary.
