

ILLUSTRATIONS TO VOL. XVIII.

Apparatus for filtering beer, by G. A. Waller, 108
 Apparatus for grinding ink, by M. Leclercq, 183
 Apparatus for measuring the flow of liquids, 298
 Apparatus for raising brine, 251
 Armour-plate screws, manufacture of, 411
 Artificial pearls, manufacture of, 110.
 Arts and Sciences, Hall of, 36
 Augers, improvements in, 163
 Auxiliary power to ships, applying, by R. Duncan, 75

Boiler, tubular, by G. Densmore, 18
 Bottle cleaning machine, by J. Walker, 347
 Bottle washing machine, by W. E. Hickling, 219.
 Brakes for railway carriages, 87
 Bessemer apparatus, improved, 408
 Bench vice, 72
 Bronzes, electric cast, 2

Carter and Edwards rifle, the, 287
 Cask washing machine, by W. King, 314
 Cartridge for breechloaders, by J. W. Cochrane, 379
 Collieries, overwinding in, 4
 Combined centrifugal pump and engine, 251
 Cutting and dressing millstones, machine for, 410

Door springs, 163
 Drilling machine, by A. B. Brown, 235

Elastic web machine, by W. Gadd, 328
 Electro-magnetic machine, by H. Wilde, 250, 267

Feeder for centrifugal sugar machines, 395
 Flax cleaning and preparing, by W. Rowan, 56, 57
 Field's machinery for manufacturing candles, 265
 Field's patent boiler tubes, 93

Fireproof ceilings and roofs, by J. Gilbert, 126
 Fortifications, construction of, 422
 Furnace, travelling, 164

Galvanic batteries, improved cells for, 413
 Gas conveying and regulating apparatus, 147
 General joiner, by S. Worsam, jun., 392
 Gimlet, improved, by E. P. Watson, 92
 Graining apparatus, by T. Titterington, 129

Hot air motors, 14
 Hot air engine, by Edwards and Co., 379

Improved capstan, by Clarke and Walker, 360
 Improved crane, by R. Duncan, 316
 Improved compound engine, 331
 Improvements in slide valves, by Mr. Beattie, 218
 Iron kloak for India, 145
 Lathe, Greenwood's improved, 92
 Lighting railway carriages, 165

Machine for rolling metals, by W. Gray, 182
 Machinery for screw nuts, by G. R. Postlethwaite, 393
 Mechanical saws, 296
 Measuring instruments, by Kirkaldy, 6
 Mediterranean telegraph cable machines, 330

Paris Exhibition, the, 1
 Pianoforte frames, 201
 Pickling apparatus, by H. A. Mansfield, 38
 Pump, double cylinder, by G. H. Bateman, 39
 Pyrometers, 159

Quadrant motion, sluice valves, by Warner and Sons, 267

Railway brake, improved, by Maraden and Bromley, 234
 Reaping apparatus, by G. M. Garrard, 282
 Rope making, by G. W. Guest, 74
 Rotary digging machine, 346

Safety steam boilers, by J. F. Howard and Co., 378
 Safety valve, combination, 411
 Scale, the Sampson, 54
 Screw steering apparatus for ships, improved, 111
 Shape and durability of heavy guns, 344
 Slate dressing machine, 90
 Spring regulator, by J. F. Belleville, 7
 Soundings, apparatus for taking, 146
 Speed indicators, by J. B. Dancer, 289
 Steam cultivating machinery, by Greig, Burton, and Parker, 290
 Steam hammers, by W. and C. Sellars, 315
 Stench trap, improved, by V. Buxton, 232
 Steering apparatus, improved, 299
 Subway, proposed Thames, 406
 Sugar cane juice, apparatus for concentrating, 128

Tan, drying, by L. M. Beval, 21
 Travelling elevator, by R. M. Van S tekler, 220
 Turbines, improvements in, 122
 Tubes, embossing metal, by H. Hughes, 20

Valve gear for steam engines, hydraulic, 422
 Vice, bench, 72

Water delivery nozzle, by W. Barbour, 201
 Weighing machine, by G. Silvester, 129
 Winding or balling twisted fibres, machine for, 42
 Wire nippers, 21
 Woollen yarn, by E. Luton, 41
