

# SYNOPSIS OF CONTENTS.

## INTRODUCTION.

### PART I.—LOWER PALÆOZOIC STRATA.

#### CHAPTER I.—STRATIGRAPHICAL OR HISTORICAL GEOLOGY—THE HISTORY OF THE FORMATION OF THE EARTH'S CRUST.

	PAGE		PAGE
Geological time, divisions of . . . . .	3	Periods and epochs, subdivisions into . . . . .	6
The progress of life, subdivisions based upon . . . . .	4	The known fossiliferous strata . . . . .	8-14
The seven ages . . . . .	4	Palæozoic rocks of North America . . . . .	15
		Thickness of stratified rocks . . . . .	15

#### CHAPTER II.—PRE-CAMBRIAN PERIOD.

Archæan or Azoic rocks . . . . .	16	Results of inquiries into the origin of the Archæan rocks . . . . .	21
Dana's four eras . . . . .	17	First appearance of life . . . . .	22
Texture of Archæan rocks . . . . .	17	Probable conditions under which the Cambrian and Silurian rocks were deposited in Europe . . . . .	24
Distribution of " . . . . .	18	Conclusions and deductions . . . . .	25
The Huronian rocks of America and Europe, comparison of . . . . .	20		

#### CHAPTER III.—THE MOST ANCIENT STRATIFIED BRITISH ROCKS.

The ten most ancient areas—		(6.) Longmynd . . . . .	27
(1.) Anglesea . . . . .	26	(7.) Malvern . . . . .	27
(2.) Bangor and Llanberis . . . . .	26	(8.) Charnwood Forest . . . . .	27
(3.) The Lleyrn promontory . . . . .	26	(9.) Wexford and Wicklow . . . . .	27
(4.) The Harlech district . . . . .	27	(10.) The Western Highlands of Scotland . . . . .	28
(5.) St. David's . . . . .	27		

#### CHAPTER IV.—LOWER CAMBRIAN PERIOD.

The Cambrian system . . . . .	28	St. David's section . . . . .	30
The Cambrian system as defined by Sedgwick . . . . .	29	Irish Cambrian rocks . . . . .	32
Longmynd, Llanberis, and Harlech groups . . . . .	29	Dr. Hicks' grouping of Lower Cambrian rocks . . . . .	33

#### CHAPTER V.—PALÆONTOLOGY OF THE LOWEST CAMBRIAN ROCKS.

The Lower Cambrian areas contrasted . . . . .	35	Harlech and Longmynd fauna . . . . .	36
		Palæontological summary . . . . .	40
