

In the present Edition, the whole work has been remodelled and corrected to the present time. The Routes to and in the vicinity of the Rhine have been revised; the description of the Money, Coins, &c. of each state has been enlarged; and an account of the Steam-Boats has been introduced, together with additional information respecting the mode and expense of travelling. The Map also attached to the volume has been carefully corrected.

Amongst the Works which the traveller will find useful in his tour, the Editor begs to recommend the following:—

DELKESKAMP'S PANORAMA OF THE RHINE,
between Cologne and Mayence.

————— PANORAMA OF THE MAINE,
between Mayence and Frankfort.

These two works are executed with such accuracy that the tourist will be able at once to recognise every object on each bank of the river.

BOYCE'S BELGIAN AND DUTCH TRAVELLER,
containing an interesting and accurate description of the United Netherlands.
