Vss. 224—231. systema dactylicum, quod etsi ita est a me dispositum, ut sex tetrametris, uno dimetro et dimetro iambico catalecticō constare videatur, tamen animadverte volo singulos illos tetrametros non pro integris versibus habendos esse, sed cunctos unum veluti versum, vel periodum dactylicam efficere.

Differt eo nomine systema-dactylicum, quod continetur versibus 236—249., ab Antigona recitatum. Hoc enim constat decem tetrametris dactylicis, uno dimetro iambico hypercat. et duobus (237. et 244.) versibus, quorum hoc est metrum:

$\text{U} \text{U} \text{U}$, $\text{U} \text{U} \text{U}$.

Vss. 232—235.

$\text{U} \text{U} \text{U}$ creticus.

$\text{U} \text{U} \text{U}$, $\text{U} \text{U}$ glyconicus.
