

THE CHEMICAL NEWS

WITH WHICH IS INCORPORATED THE

CHEMICAL GAZETTE.

Edited by]

[William Crookes.

No. 3.] { Copyright of the Contents reserved. }

Saturday, December 24, 1859.

{ Registered for Transmission abroad. } PRICE 3d. STAMPED, 4d.

CONTENTS.

	PAGE.
Scientific and Analytical Chemistry	
Remarks on Parkes's Method for the Estimation of Copper by means of Cyanide of Potassium	25
Technical Chemistry	
Description of a Patent Blast Gas Furnace, by J. J. GRIFFIN, F.C.S.	27
Pharmacy, Toxicology, &c.	
Chemical Researches on the Essential Oil of Valerian, by M. PIERLOT	29
On a Modification of the Chlorate of Potash Method for the Oxidation of Organic Matter in the Detection of Mineral Poisons, by G. T. GLOVER	30
Proceedings of Societies	
Chemical Society	30
Notices of Books and Patents	
A Handbook of Chemical Manipulation, by C. GREVILLE WILLIAMS	32
Improvements in Treating and Purifying Gutta Serena	33
Improvements in Treating certain Ores	33
Improvements in Re-working Compounds of India-rubber and Sulphur	33
Correspondence	
Chemical Notices from foreign Sources, by DR. T. L. PHIPSON	34
Scientific Notes and Queries	
Gunpowder and its Improvement	35
Detection of Metallic Poisons by means of the Galvanic Battery	36
Note on the Murexide Dyes	36
Purification of Water by means of Metallic Iron	36
Laboratory Memoranda	
Coloured flames	36
To determine the amount of Alcohol in Wines and other Alcoholic Mixtures	36
Miscellaneous	36
Answers to Correspondents	36

Advertisements.

FARADAY'S

CHRISTMAS LECTURES at the ROYAL INSTITUTION.

The "CHEMICAL NEWS" will contain verbatim Reports of these Lectures, copiously illustrated with Engravings.

Just published, 8vo. cloth, price 1s.6d.

ELECTRO-CHEMISTRY.

(In which it is demonstrated that there is a Latent Electricity existing in bodies, as well as a Latent Heat; and that those bodies, when deprived of their Latent Electricity, indicate a change in their characteristic properties.) By CHARLES CHALMERS, late of Merchiston Academy.

London: JOHN CHURCHILL, New Burlington Street; MACLACHLAN & STEWART, Edinburgh; and G. & B. KING, Aberdeen. May also be had of the Author, Merchiston Castle Bank, Edinburgh.

Quando ullum indenemus parem?

THE CHEMISTS' Printer, ENGRAVER AND LITHOGRAPHER, H. SILVERLOCK, MEDICAL LABEL WAREHOUSE, WARDROBE TERRACE, LONDON. E.C.

Recently published, in 1 vol. 8vo. with 3 Plates, price 15s. cloth.

EXPERIMENTAL RESEARCHES IN CHEMISTRY AND PHYSICS.

By MICHAEL FARADAY, D.C.L., F.R.S.

[Reprinted from the "Philosophical Transactions" of 1821-1857; the "Journal of the Royal Institution;" the "Philosophical Magazine," and other publications.]

"In conclusion, we can only repeat the assertion with which we commenced this article. This is a book which ought to be in the library of every scientific man."—*Literary Gazette*, Feb. 19, 1859

TAYLOR & FRANCIS, Red Lion Court, Fleet Street, London.

Shortly will be published, in one large closely printed volume with Forty Plates, Price, to Subscribers, Thirty Shillings, payable on delivery.

THE FOURTH EDITION OF

PRITCHARD'S

HISTORY OF INFUSORIA, LIVING AND FOSSIL.

In preparing a new edition of the above Work, the Author is desirous to afford a complete and succinct account of the multitude of microscopic beings grouped together by Ehrenberg under the name *Infusoria*, and to represent impartially the numerous discoveries and opinions of British, American, and Continental naturalists. With this end in view, he has found it necessary to remodel and revise the entire work, and to make such additions (including descriptions of new species, British and Foreign) as will double the matter contained in the volume of 1852.

To complete a task so extensive and laborious, he has found it necessary to seek the assistance of Naturalists eminent on this subject, and has accordingly secured the co-operation of Dr. ARLIDGE, to prepare the general history of the Bacillaria, Phytozoa, Protozoa, Rotatoria, and Tardigrada;—of MR. RALFS, to re-arrange the descriptions of those beautiful organisms the Desmidiæ and Diatomæ;—and of PROFESSOR WILLIAMSON, to revise and extend the history of those highly organised and interesting animalcules, the Rotatoria and Tardigrada.

New Plates will be added to illustrate the latest results of modern research; those on the Diatomæ MR. TUFFEN WEST has engaged to draw and engrave.

It is confidently believed the Fourth Edition will fully sustain the reputation of every previous one, and form a Manual alike useful to the Naturalist, the Geologist, and the Microscopic Observer.

The Manuscripts of DR. ARLIDGE and PROFESSOR WILLIAMSON have been received—that of MR. RALFS is expected shortly. 704 pages of the Work are printed, and 34 Plates engraved.—All communication are requested to be addressed to ANDREW PRITCHARD, Esq., St. Mary's Place Canonbury, N. London.
