The following are exhibited:—

	£ s. d.		£ s. d.
ARMSTRONG'S IMPROVED WATCHMAN'S CLOCK is an ordinary office Timepiece and Watchman's clock combined, for indicating punctuality and registering the neglect of it. It is entirely self-acting, portable, simple in construction, and requires little attention. Price, in plain mahogany case, dial 14 inches diameter . . . . .	4 15 0	ARMSTRONG'S IMPROVED WATCHMAN'S CLOCK, same as the above, but in a more highly ornamented case, dial 12 inches diameter . . . . .	5 10 0
		ARMSTRONG'S IMPROVED STEAM OR SPEED CLOCK indicates the amount of work done in all establishments where steam-power is used. It also compels the engineer to work at the required pressure, by indicating any neglect. In mahogany case complete, for fixing . . . . .	2 15 0
