

INDEX.

- Absorption and reflection of light, 412
 — of chemicals by the skin, 220
 — of poisons, 476
- Abyssinian expedition, photography and the, 475, 507, 519, 534
- Academy, a photographer's ramble through the, exhibition, by Artist Bike, 268, 279
- Activity in photography, 311
 — of light, the persistent, 463
- Adhesive medallion portraits, 616
- Aid to development, another, 154
- Aids to clean manipulation, by Alexander Asher, remarks on, 87, 100
- Album, by John Spooner, improved, 320
 — of diplomats, an, 335
- Albumen paper, report of the committee on sensitizing baths for, 185
 —, the decomposition and constitution of, 497
- Albuminized paper, cost of, 447, 476
- Alkalies, test for, 592
- Alkaline development for Fothergill plates, 11
- Amalgamation, North London, 178
 —, rumour of society, 98, 131, 159
 — scheme, withdrawal of the, 209
- Amateur Photographic Association, 214, 541, 553, 597
 — photography in the country, 35
- America, introduction of photography into, 580
 —, photo-lithographing in, 156, 375
 —, photo-lithography and photographic enterprise, 433
 —, photographic weather in, 192
- American Photographic Almanac, by Towler, 41
 — Photographic Society, 118, 153, 238, 297, 311
 — photographs, 218
 — at the Paris exhibition, 96
- Angular measurement of a picture, by H. R. Twining, 213
- Aniline black, 531
 — colours for tinting photographs, by J. Grasshoff, 465
 — dyes, aqueous solutions of, the, 376
- Anthony's new developer, 296
- Application de la photographie aux levés militaires, 219
 — of photography, 352, 288
- Architectural photography, by Warwick King, on, 597
- Art and photography, 22
 — pirating photography, 121
 — photographs, 20
 — union, questionable photographic, 11, 35
- Artificial eyes, photographs of, 349
 — light, by Thomas Skilife, instantaneous pictures by, 361
- Artistic copyright, 599
- Artist models, photography and, 298
- Asher, Alexander, remarks on aids to clean manipulation, by, 87, 100
- Ashford v. Graves, 84
- Ashton's patent, 4, 10, 166, 421
- Atmosphere, microscopic examination of the, 543
- Autographic engraving process, another, 252
- Avey's vignette glass, 363
- Award of prizes, Royal Cornwall Polytechnical Exhibition, 415, 423
- Awards at Paris exhibition, photographic, 342, 422
- BACKGROUNDs and accessories, 242
- Bank notes, forging, 508
- Baratti's photo-plastic process, etc., Col., 118
- Business suggestions, 152
- Bellows camera, how to make a, 395
- Beverley, Mr. A., remarks on printing, 501
- Bichromate of potash, &c., by J. W. Swan, on the causes which produce insolubility in a mixture of gelatine and, 381
- Binocular vision, by A. Claudet, F.R.S., the physiology of, 79, 90, 102, 468
 —, a new fact relating to, by A. Claudet, F.R.S., 469
- Bitumen, 142
 — for photographs in oil colours, 130
- Black for retouching photographs, 220
 — mail, alleged, 240, 311
- Blair on Swan's carbon process, 374
- Blanchard, V., on the best means of rendering silver prints permanent, 243
 —, the preservation of prints by collodion, 563
 —, something more on lighting, 525
 —, the naval review from a photographic point of view, by, 371, 382
 —, winter photography, 133
- Blanchard's method of collodionized prints, Mr., 256
 — of preserving plates during long exposures, 275
 — of preserving silver prints, 241
- Blisters in collodio-albumen plates, iodide of, aluminum in collodion, prevention of, 65
- Blue glass in photography, by M. McA. Gaudin, on the employment of, 113
- Bockett, John, what branches of photography will be found most amusing and interesting to the amateur, by, 549
- Botany and natural history, 463
 — at the Paris Exhibition, 8
- Borders, &c., double-printing for, 127, 192
- Bovey, W. T., a few thoughts suggested by a leader of May 17th in the News, 257
 —, cheapness and its results, by, 443
 —, fireside musings, by, 573, 573, 584
 —, ideas versus inventions, 352
 —, inventors and claimants, by, 494
- Brasswork, a dead black on, 507
- Breaking of negatives, by P. Meagher, 502
- British Association at Dundee, meeting of the, 427, 440, 455, 463
- Broken glass, cements for joining, 394
- Bromide of ammonium, preparation of iodide and, 517
- Bromine in the same solution and in presence of chlorine, by Dr. T. L. Phipson, on an easy method of recognizing iodine, 343
- Bromo-iodized collodion, keeping and dating, 391
 —, on keeping collodion, 485
- Brussels, photography in, 505
- "Bulletin Belge de la Photographie," 4
- CABINET pictures, by Prof. Towler, 200
 — portraits, 97, 157, 183, 205, 214, 226, 227, 230, 314, 476, 486, 538
 — amid snow and ice scenery, 157
- Calcium light, the, 529
- California, photography in, 483
- Canvas, photography on, 470
 —, permanent photographs on, 109
 —, photographing on, 71, 77, 178
 —, photography on wood and, 191
- Caoutchouc, coating with, 19
- Capsules for bottles, 471
- Carbolic acid in photography, by Dr. P. J. Kaiser, on the employment of, 64
- Carbon, direct prints, Griswold's, 215
 — printing, 193, 322, 363, 369, 387, 519
 — printing, by J. W. Swan, practical details, 18
 — printing, by Prof. Towler, 126
 — printing, Nelson K. Cherrill, 134, 387, 453
 — printing, photo-lithography, photo-engravings, memoranda of the history, 258, 270, 281, 296, 443
 — printing, various modifications and applications of, 159
 — printing v. silver printing, 83, 378, 411
 — prints in circulation, 484
 — process, 582
 —, another, 155
 —, Braun's or Swan's, 498
 —, Braun's, Swan's, 10
 —, &c., rough notes on the, 343
 — in commercial use, 143, 202
 — in France, 46, 591
 — for reproduction of line or stipple, by J. W. Swan, 122
 —, Mr. Blair on Swan's, 374
 — practicable, is Swan's, 14
 —, Swan's, 325
 —, the American, 245, 316
 — tissue, American, 384
 —, sensitizing the, 18
- Carlyle's tannin process, Mr., 204
- Carte, a la, 597
- Cases for photographs, by R. Newhall, 471
- Cassell's "Popular Educator," 571
- Cast shadows by sunlight, 579
- Cause of insolubility in a mixture of gelatine and bichromate of potash, by J. W. Swan, on the, 381
- Caution to photographers, a thief's photograph, 359, 363
- Carving surfaces, by R. Howe Ashton, printing, 421
- Cements and uniting bodies, by a Practical Man, 232
- Cement for joining broken glass, 394
- Certain new processes in photography, by J. Spiller, F.C.S., on, 442
- Chambers or tents, by E. Cox, photographic, 9
- Channel Islands, views in, 40
- Charge against a photographer, extraordinary, 459
- Chassis-cuvette, the, or sensitizing frame, 587
- Chat about dark rooms, 589, 575
- Cheap source of oxygen, 107
- Cheapness and its threatened results, by W. T. Bovey, 443
 — and patents, by a Practical Man, a word or two on, 392
- "Chemical News, The," 363
 — philosophy, an introduction to, 110
 — science, 441
- Cherrill, Nelson K., a few considerations on the connection of diffusion of focus and pictorial softness, 197
 —, Adam-Salomon's pictures, by, 305
 —, a suggestion for the better ventilation of dark rooms, by, 499
 —, carbon printing, 134, 453
 —, cutting glass under water with a pair of scissors, 111
 —, the scope of photography, by, 7, 41
- Chevallier's photographic plane-table, M., 135
- Children, by J. Inglis, formulae for pictures of, 53
 —, portraits of, 237
- Christmas cards, &c., &c., by a Practical Man, a few further hints to photographers on the production of, 487
- Chlorine, by Dr. T. L. Phipson, on an easy Chloride of silver, by M. Morren, on the action of light on, 611
 — method of recognizing iodine and bromine in the same solution and in presence of, 343
- Chlorine, how to prepare, 252
 — of carbonate of silver, preparation of chlorate of silver, by Prof. J. Stas, on the action of, 408
- Chloroform, action of light on, 300
- Chromate of mercury printing process, by M. Guardabassi, 384
- Chromium, sulphocyanide of, 532
- Chloro-iodized collodion, 407
- Chlorized collodion, 387, 406
- Cigar-tube photographs, magic, 10, 541, 555, 566, 578, 591
- Civilization, photography and, 335
- Clarifying action of sulphate of alumina on turbid water, 436
- Claudet A., a new fact relating to binocular vision, 463
 —, on a self-acting focus equalizer, by, 261
 —, physiology of binocular vision, by, 79, 92, 102
 —, unity of measure for enlargements, by, 90, 193
 —, letter from H. Somers, Ph.D., to, 31
- Clean manipulation, by Alexander Asher, re-cleaning stains on the hands, 598
 — marks on aids to, 87, 100
- Clothing, photographs of the late Emperor Maximilian's, 399
- Clouds, by Rev. H. J. Morton, D.D., the, 68
 — in landscape photography, by Frank Howard, 610
- Cocco, M. G. L., on a method of restoring discoloured and insensitive collodion, by, 151
- Cocking, Edwin, a suggestion for raising the position of photographers, 609
- Coffee, dry process, the, 498, 542
- Collodio-albumen pictures, M. Ferrier's instantaneous, 232
 — process, 322
 —, another modified, 243
 — processes, 316
 — process, by Sebastian Davis, on Mr. England's modified, 236
 —, modified, 131
 —, requiring but one sensitizing bath, by W. England, a modification of the, 187
 —, Mr. England's modification of, 159, 169, 243, 275, 304
 —, Mr. Maxwell Lyte's modified, 327
 —, Mr. Manners Gordon's modification of the, 269
- Collodio-bromide of silver process, 341
- Collodio-chloride, 223
 — and wood-engraving, 399
 — of silver pictures on opal-glass, 217
 — process, origin of the, 380, 435
 —, pictures in Conduit Street, 580, 592
 —, who discovered the, 492
- Collodion as a protection for prints, 423
 —, by W. A. Terry, on the manufacture of, 319
 — films for transferring, 369
