Post free, per Sheet, 1s.; Quarter-Quire, 5s.; Half-Quire, 8s.; Quire, 15s.; in stout cardboard tubes.

VOIGTLANDER'S NEW LENS,

DOUBLE OBJECTIV,

OF GREAT ILLUMINATING POWER,

FOR EVERY KIND OF LANDSCAPE WORK, ARCHITECTURE, AND REPRODUCTION.

ESPECIALLY VALUABLE FOR GROUPS, BOTH IN AND OUT OF THE STUDIO.

NOW IN THE HANDS OF LEADING PHOTOGRAPHERS.

This Lens possesses remarkable properties, owing to the power of light it commands. Its construction is based on calculations made by Professor SOMMER, of Brunswick, marking a new era in Photographic Optics. The results obtainable will at once show that a Photographer's equipment is incomplete without it. The new Lens is composed of two Symmetrical Objectives, constructed on an entirely new principle. It can be used for groups with the full aperture, and thus gives a depth of focus as yet unapproached in photographic lenses. It is perfectly Aplanat consequently for Copying Maps, or any work requiring absolute precision, it must take the first rank.

R. W. THOMAS, 10, Pall Mall, London,

Sole Agent, Wholesale and Retail, in Great Britain, India, Canada, and British Settlements, for the Sale of Voigtlander's Photographic Lenses.

A Prospectus, with Full Particulars, post free on receipt of Stamped Envelope.
