SPECIALITIES—

FALLOWFIELD'S NEW PORTABLE DRY-PLATE CAMERA.

This Camera is similar in construction to the New Folding Camera, the unprecedented success of which, and the universal want for a Dry Plate Camera in a portable form, have caused our attention to be directed to the same; and we feel confident that a trial will ensure it the fullest satisfaction as a most perfect and useful Camera. It is made of the best materials, with leather bellows, rising front. Rack-and-pinion adjustment can be added if required.

For plates $6\frac{1}{2} \times 4\frac{3}{4}$ with one double slide £2 17 0
 " $7\frac{1}{4} \times 4\frac{3}{4}$ " " " 3 0 0
 " 8×5 " " " 3 10 0
 Extra double slides $\frac{1}{2}$ plate 12s.; $7\frac{1}{4} \times 4\frac{3}{4}$ 14s.; 8×5 16s. each.
 Rack and Pinion adjustment to either of the above, 12s. extra.

THE POCKET OR SACHEL CAMERA. Price £2 2s.—

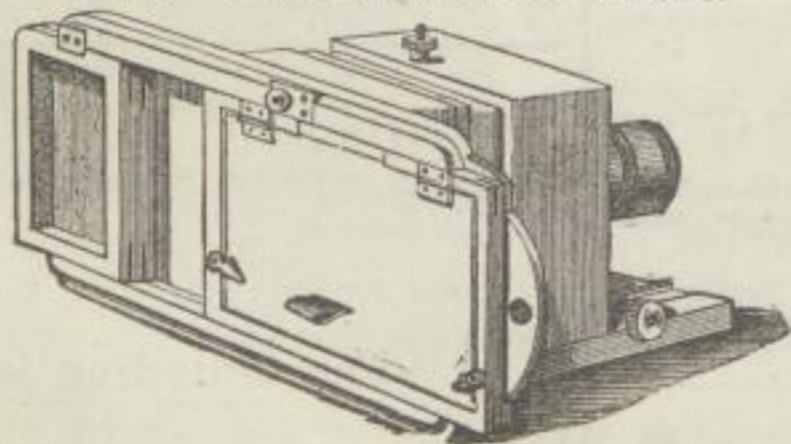

Specially adapted for Dry Photography, and offers many advantages to the Tourist, including simplicity, lightness, and portability. No Tourist should be without this very useful Camera.

This Camera has now stood the test of three seasons, and we can with confidence recommend it to all class of Photographers. It is of the best manufacture, with leather bellows and focussing adjustment, is very simple and effective, and is worked by a fixing screw at the side. Rack-and-pinion can be added if required.

Price of Camera with the double slide £1 7s.—Two double slides 6s. each 12s.—Rack and Pinion 7s.—Improved Sliding Stand 14s.

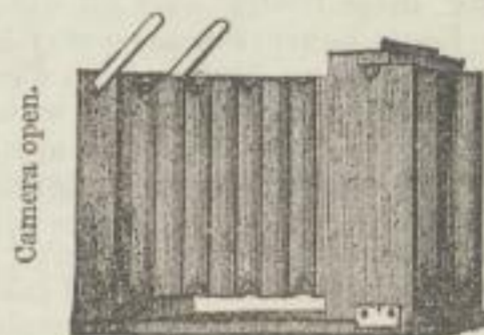

This Stand is extremely portable, and specially adapted for work on uneven ground, and it will be found, on inspection, to be superior to any other in the market.

IMPROVED CAMERA, for taking two Carte-de-Visite Pictures with one Lens.

Improved Camera, with repeating back of Spanish mahogany, for two stereoscopic pictures on a plate $6\frac{3}{4}$ by $3\frac{1}{4}$, or two carte-de-visite pictures on a plate $7\frac{1}{4}$ by $4\frac{3}{4}$, with one slide, focussing screen, and rack-and-pinion adjustment £2 15 0

FALLOWFIELD'S FOLDING CAMERA.

This Camera has now stood its trial since the beginning of 1872, and has been universally used by the profession. The unprecedented sale thereof speaks plainly for its superiority over all other Cameras. The following are some of the numerous Testimonials already received.

118, New Bond Street, Oct. 1, 1872.
 Sir,—We are much pleased with your NEW FOLDING CAMERA, and find it very convenient in every respect.—TRUCKLE & BRISCOM.

Epsom, Dec. 16, 1872.
 GENTLEMEN,—Your NEW FOLDING CAMERA is the only one I have used this last season for all my outdoor work, it being very rigid and well adapted to my shortest focus Doublet Lens, also my Portrait, Triplet, and Rapid Rectilinear of longer focus.—I am, Gentlemen, yours obediently, C. J. HOPKINS.

Beckenham, Dec. 26, 1872.
 MR. FALLOWFIELD. Sir,—I have given your NEW FOLDING CAMERA a thorough trial, and have found it to answer admirably all purposes for which I have used it. It is the neatest, most simple, compact, and the most easily managed Camera I have yet seen, and is suitable for very short or long foci.—D. NETTLE.

It surpasses all other form of Folding Camera for its simplicity of construction. All loose screws being dispensed with, can be focused with great accuracy without the winch screw, which can be added if required. It is suitable for the shortest focus lenses to ten inches and upwards. These Cameras are equally suitable either for the Studio or Field. They are made of Spanish Mahogany, best Leather Bellows, Rising Front, and are highly finished, and will be found, on inspection, to surpass all other Cameras for price and quality.

Square, for Plates	With Winch Screw.
