

ROUCH'S NEW PATENT CAMERA.

This Camera is acknowledged by all who have used it to be the lightest and most convenient for Landscape purposes that has been produced and is undoubtedly the best instrument for every description of Dry Plate work. The double swing back renders it also peculiarly useful in portraiture. These advantages are gained by an entirely new arrangement of the various parts, and without in any way impairing the efficiency or strength of the instrument. This Camera should be inspected by all intending purchasers. *Full Particulars on Application.*

ROUCH'S IMPROVED MODEL PHOTOGRAPHIC SETS.

By a slight modification in the construction of the above well-known Tent it can be used for Changing or Developing Dry Plates in the house or the field. It provides material for developing, and space for carrying, Three Dozen Dry Plates at a time. It is extremely light, and is supplied in two sizes, viz.: for $8\frac{1}{2} \times 6\frac{1}{2}$ and under, price Complete with Double-Ruby Glass Window, £6 10s.; for 12×10 , £7 10s. The above, by the removal of one of the windows, can be used for the Wet Process. N.B.—This modification can be used with the utmost safety in any part of the World.

ROUCH'S NEW NEGATIVE COLLODION
