

Gelatine emulsion, coating plates with, 17, 49
 —, 178
 — compared with collodion emulsion, by H. W. Vogel, 423
 —, effects produced by varying amount of water, 497
 — negatives, gradation in, by E. Cocking, 77
 —, washing and fixing, 114, 161
 —, drying box for, by T. C. Whaitte, 604
 —, over-intensified with mercury, by C. Alfieri, 662
 — plates, development of, by W. B. Allison, 375
 —, 609
 —, Developing, by E. Brightman, 794
 Gelatino-bromide paper, Messrs. Morgan and Kidd's improvements, 50
 — chloride emulsion in the camera, by A. Cowan, 221
 —, Dr. Eder's experimental investigations, 243
 —, Eder's work on, 387
 — and hot weather, 466
 — paper, Hutinet's, 563
 — printing on, 623
 — for positive pictures, 721, 733, 786
 Glass, 3, 98, 226, 419, 757
 —, coloured photographs on, 611
 —, photographs on, 740
 — plate, spreading emulsion on, 129
 — plate for coating with emulsion, 674
 — roof, the, 405
 — soaked with silver for the gelatine process, by Captain Abney, R.E., F.R.S., 155
 — stoppers, fixed, removal of, 135
 Glasgow and West of Scotland Photographic Society, 31, 160, 670, 701, 733, 751, 766, 815
 Glaze photographs, how to, by E. Wideman, 716
 Goodall, A., Enlarging on argentic paper and opals, 711
 Goold, E., Marion's ferro-prussiate process, 118
 — Pell et's patent copying process, 119
