

bro 3. cap. 3. Sic & Thermarum Carolinarum in Boëmia guttæ in calcis gypsiuë substantiam vertuntur. Chirurghi Germanorum huiusmodi lapides, stirijs præsertim similes, aut crustaceos quidem, sed bullis quibusdã eminentibus inæquales, *Wallstein* appellât, quasi osteocollos dicas: quòd ijs in emplastra additis vim ossa, infantium præsertim, ferruminandi inesse existiment. Meminit eorũ in sua Chirurgia Germanica Hieronymus Brunsvicensis. Horum species duas hîc delineatas subiicio.

1. *Molaris lapis.*
2. *Osteocollus crustaceus: qui & πλακόλι-
& ficto nomine dici potest.*
