

De figuris lapidum, &c.

culo, ciusdēq; ferè latitudine & cras-
sitie, è fusco pallidus. Pars vna, quæ in-
terior esse vi-
detur, zonis
trāfueris mo-
dicè incuruis,
quiñis distin-
guitur, quæ p
latera etiā in-
flexæ ascēdūt.

Superior autē pars læuis est. In extre-
mo tuberculū rotundum prominet:
cui in parte opposita respondet caui-
tas. Satis durus & grauis est.
