sunt æquales.

16.

Hoc verò punc^{tum}, centrum circuli appellatur.

17.

Diameter autem circuli, est recta quædam linea per centrum ducta, & ex utraque parte in circuli peripheriam terminata, quæ circulum bifariam secat.

18.

Semicirculus verò est figura, quæ continetur sub diametro, & sub ea linea, quæ de circuli peripheria afferatur.

19.

Rectæ lineæ figuræ sunt, quæ sub rectis lineis continentur.

20. Tri-
