

## M O S T E R T

We hereby give two young artists a chance! Niethammer and Mostert come from the Stuttgart school. In part one can detect in their work the sure hand of their master Professor Schneider, instructor of commercial art at the Stuttgart School of Art. In all their practical work we find clarity of composition, graphic ability and due attention paid to the demands of effective publicity. The photography and the drawing are already combined with considerable talent. In some of the examples shown, the arts and crafts touch and the system of the school are somewhat obvious, but we have here two young artists of talent, who undoubtedly deserve a chance to perfect themselves in practical tasks.
