

IRON ORE • PIG IRON • COAL • COKE

Massive floating fleets of bunkers, these stupendous iron ore freighters... journeying week after week, month after month, laden deep with rich red cargoes... eagerly waiting at the docks to be reloaded with their 10,000 ton loads... then out again, filling on the broad back of Superior bay waters. This is the story of Modern steel-making... the story of modern transportation and dependable deliveries of Cleveland-Cliffs Iron Ore.
