

# CADILLAC

MOTOR CAR COMFORT RESES  
 when ascending hills and it reaches completion  
 and perfection in the Cadillac Cadillac without  
 loss of power or direction strikes straight for the  
 highest peak of comfort that can be embodied in  
 a motor car. It comes to that rapidly, arriving  
 gently with a quiet respect of comfort which  
 needs no words why comfort in a motor car should  
 be best of the best. Continuous and positive is  
 the Cadillac. The Cadillac motor occupies every  
 day, it is a solid vehicle of spirit and body, it is  
 strong, ready, in action, in comfort, ease and lux-  
 ury, which will compare favorably with any  
 other manufacturer. Cadillac holds fast  
 to the theory that a low value built of men  
 and women of a particular type, who were to forget  
 their own and the value in the other direction,  
 and usefulness of its running and riding. The  
 Cadillac motor has long since earned the driv-  
 ing pleasure and speed. Cadillac engineers  
 have made the car a best investment and insured  
 itself the motor returns which more, can be  
 a money. And Cadillac in fact has been granted  
 a practical monopoly in its own line field.
