

QUEEN OF ROSES PERFUMERY

Caesar Birotteau, Paris

BIROTTEAU'S
SULTANA SKIN-FOOD
AND
VENUS EAU-DE-TOILETTE

Nothing better for the skin.

Examined and recommended by physicians

Moved by the urge to beauty, Europeans of both sexes, time out of mind have used a SKIN-FOOD,

an emollient cream for the care of the hands and an essence for the face which should be still more efficacious than the famous

EAU DE COLOGNE

Now that

CAESAR BIROTTEAU

after devoting many sleepless nights to the scientific study of the derma and epidermis of man and woman, knowing that both sexes rightly value a fine, smooth, white, velvety skin

has at last met with the deserved success

CAESAR BIROTTEAU

famous in Paris, in France, all over the world as a manufacturer of

FINEST PERFUMES

has at last succeeded in perfecting a SKIN-FOOD and an ESSENCE which have been proclaimed by Parisian leaders of fashion, both ladies and gentlemen, to be

PERFECTLY WONDERFUL

It is a fact that this new cream and this new essence are imbued with extraordinary qualities. They beautify and stimulate the skin without the possibility of inflicting any damage upon it or upon the general health of the user. This possibility was the undeniable disadvantage of all amateurishly concocted drugs of this kind previously placed upon the market by persons lacking in conscience and greedy of gain. The new discovery takes into account the

TEMPERAMENT OF THE USER

and is thus divided into two classes, outwardly characterised by the

COLOR OF BOTH CREAM AND ESSENCE

The white variety is suited to the derma and epidermis of the Phlegmatic, the rose-red variety to those of Sanguine temperament.

The skin cream is known by the name of

SULTANA SKIN-FOOD

since an Arabian physician already succeeded in discovering this mixture and offering it to his master, an Eastern potentate, for the ladies of his harem. The

VENUS EAU DE TOILETTE

is put together on the same principles. Both receipts have been thoroughly analysed and certified by Professor Vauquelin, the well-known chemist of the University of Paris.

B A L Z A C

This glorious Sultana Skin-Food, scented with all the perfumes of Arabia, cures the most obstinate freckles, does away with the most persistent impurities of the skin and banishes perspiration of the hands, equally troublesome to man and woman.

Venus Eau de Toilette obliterates with phenomena rapidity the spots and pimples which so often appear suddenly at the most unwelcome moments to annoy the ladies and spoil their enjoyment of a dinner or a dance. It refreshes and animates the skin, either opening or closing the pores as the temperament in question may require. Above all it keeps off the symptoms of approaching age, so that its grateful users far and wide are quite right in referring to it as a veritable

ELIXIR OF BEAUTY

Whereas Eau de Cologne is nothing more than an ordinary perfume without any special effects,

SULTANA SKIN-FOOD AND VENUS EAU DE TOILETTE

are two medicinal compounds with active properties, absolutely innocuous to the constitution, in fact indirectly beneficial. The aromatic perfume of these skin-foods refreshes heart and head, stimulates the imagination and invigorates the brain. These effects are the more astonishing as the application of the skin-foods is so simple. In short, Sultana Skin-food and Venus Eau de Toilette add to the charms of every lady, whereas their use imparts to every gentleman an extraordinary attractive power of which no-one should fail to take advantage.

The daily use of Venus Eau de Toilette protects the skin from roughness after shaving, prevents the lips from splitting and preserves their natural crimson. Continual use completely prevents freckles; the complexion becomes faultlessly pure and clear. A fresh and healthy complexion is well known to be the sign of a cheery and harmonious spirit; but it is a scientific fact that the rule also works backwards. Healthy complexions make cheerful companions. People who suffer from nervous headaches and depression should not neglect to try this remedy.

Sultana Skin-food and Venus Eau de Toilette may be obtained (enclose postage) from

CAESAR BIROTTEAU, late Ragon,

formerly Court Purveyor to Queen Marie Antoinette,

QUEEN OF ROSES PERFUMERY,

Paris, Rue Saint-Honoré. Place Vendôme.

A pot of Sultana Cream costs three francs, a bottle of Venus Eau de Toilette six francs.

In order to protect themselves against inferior imitations, the public are requested to note that Sultana Skin-food is packed in paper bearing the autograph signature of the inventor, whereas bottle of Venus Eau de Toilette is genuine only when it bears his embossed seal.
