

Plakate für das Winterhilfswerk und die Ansteckplakette für das Weihnachtsfest

Posters for the Winter Relief Organization and the button-hole paper disc for Christmas

in kind is divided into fifty-seven categories, and in none of them was the quantity less than in the few examples given above. That steps were taken not only to banish distress but also to cause pleasure is obvious from the fact that 1,303 cwt. of chocolate for the children and 139,339 litres of wine were distributed. Special attention was always devoted to the children who must be kept healthy and strong at all costs, even in times of need. Hence the distribution was not confined merely to potatoes, flour and the like, which just keep people alive, but everything was collected which serves for a really good and varied diet, even when the articles were difficult to store and their perishable nature made it necessary to organize their distribution rapidly and precisely. Thus 4.7 million litres of fresh milk and 134,604 cwt. of fresh vegetables were issued, especially to large families. Conditions were similar in the case of fresh fish and all kinds of fat. But the trouble was repaid and the goal attained. No one went hungry last winter, and no one will suffer from hunger or cold in the coming winter. The Winter Relief Organization has started work, all helpers will help again, and every fellow-citizen will contribute what he can spare. This year complete success is already a matter of course.
