HAGEN

The far-famed printing firm of Andreasen & Lachmann of Copenhagen issued an album on the occasion of the 50th anniversary of the founding of the firm. Twelve Copenhagen artists painted and sketched scenes in Copenhagen, and the Danish poet Mogens Lorentzen wrote twelve poems to accompany these illustrations. The reproduction of the coloured plates was done with all the different technical processes used by this printing house. The reproduction of the illustrations is so excellent that one believes that one is looking at the originals.

We congratulate the firm on this achievement and on their jubilee.
