

# RIO DE JANEIRO PICTURE STORIES

Twelve years of tropical sun have not dried up H. A. Rey's humour. He is resident in Rio de Janeiro as a graphic artist and illustrator, and his work is distinguished by its strikingly clever ideas which he reproduces on paper with enviable facility and charm of colour and form. This artist shows a decided gift for drawing films and has already executed a number with great ingenuity and skill; his "Picture Stories" give particular proof of his talent in this direction, and are frequently reminiscent of extracts from trick films.
