

HANDWEBEREIEN

hangings were designed which afford perfect examples of harmony between the artist's design and handweaver's medium. Here was that unity formed by graphic art, painting and the intuition of remarkable craftsmanship which is the purpose of all such handwoven decorative work. To put it briefly, Alen Müller-Hellwig does not only transmute designs into the materials of her handicraft, she creates rather those handwoven masterpieces that have made her notable in the sphere of modern German handicraft.
