

CARL FABRIZ

Dekoration der Großen Festhalle am Tag des Deutschen Handwerks in Frankfurt am Main

Decorations in the "Great Hall" on the Day of German Handicraft, Frankfurt-on-Main

No longer did the artist make toys of incongruous material, rather did he adapt his creations to his tools and machines. From making wooden toys, designing games and picture-books Carl Fabriz soon turned his attention to mechanical tin toys. He invented new types of toys in artistic forms and shapes. These toys were great hits at the big Industrial Fairs

Ornamental coat-of-arms made of woven wood-shavings on hostels in the "Diplomats' Village", Reich Party Day, Nuremberg

Messing-Adler einer DAF. - Festdekoration
Brass eagle, Festive decoration for German Labour Front
