

Elementary mathematics

- 1/182 Square prism and its development
- 1 a/182₁ Like model 1/182, but two sides of the prism are removed and half of a diagonal plane is set in
- 2/182 a Cube with its development
- 2 a/182 a₁ Like model 2/182 a, but two sides of the cube are removed and half a diagonal plane is set in
- 3/182 b Rectangular parallelepiped with its development
- 3 a/182 b₁ Like model 3/182 b, but two sides of the rectangular parallelepiped are removed and half a diagonal plane is set in
- 4/182 c Triangular prism (wedge) with its development
- 5/182 d Regular quadrilateral pyramid with its development
- 5 a/182 d₁ Like model 5/182 d, but two sides of the pyramid are removed and half a diagonal plane is set in
- 6/182 e Regular pyramid with its development
- 7/182 f A right circular cylinder with its developable lateral area and two base circles
- 8/182 g A right circular cone with its developable lateral area and one base circle
- 9/182 h A sphere with a mechanism for drawing great circles and two other circles
- 10/184 A right and an oblique prism of equal volume
- 11/189 a Cube with six congruent pyramids
- 12/189 b Cube with three pyramids of equal volume
- 13/175 A prism divided into three pyramids of equal volume
- 14/198 Angle of circumference and centre angle of a circle
- 15/191 Angle which is formed by the tangent and by the chord of a circle
- 16/192 Properties of the chordal square
- 17/199 The circular functions
- 18/188 A geometric representation of the formula
- $$(a + b)^3 = a^3 + 3 a^2 b + 3 a b^2 + b^3$$
- 19/178 An experimental proof for the sum of the angles in a triangle
- 20/601 Representation of spherical triangles
- 21/602 Spherical dihedral angle
- 22/603 Spherical triangle
- 23/604 Model of a rectangular trihedral angle for the deduction of Napier's rule
- 24/605 Oblique quadrilateral prism
- 25/606 Right quadrilateral prism
