

## Geometry

100/19	Proof of a theorem of solid geometry
101/34	Intersection of two planes
102/174	A trilateral pyramid with the projecting planes of its edges and with the projecting planes of the altitudes of its triangles
103/17	Intersection of a plane and a straight line
104/86	} Intersecting points of a straight line with the lateral area of a pyramid
105/87	
106/120	Trihedral angle with a spherical triangle
107/67	Theorem of Desargues
107/118	Sine theorem of the spherical trigonometry
108/121	The first cosine theorem of the spherical trigonometry
109/119	Trihedral angle and polar solid angle
110/32	Polar coordinates in space (Spherical coordinates)
111/128	Two coordinate systems on the sphere
114/83 a	} Penetration of two prisms
115/83 b	
116/83 c	
117/35 a	} Penetration of two pyramids
118/35 b	
119/35 c	
120/108	} Penetration of a prism and a pyramid
121/109	
122/110	
123/31 a	} Penetration of two right circular cylinders
124/31 b	
125/31 c	
126/31 d	
127/79	} Penetration of two right circular cones
128/80	
129/81	
130/82	} Penetration of a right circular cylinder and a right circular cone
131/136	
132/137	
133/138	
134/139	
138/618	Seven-sided roof
139/619	Composed roof
140/167	Basic model for the construction of sun-dials
141/168	Sun-dials on a horizontal and a vertical plane respectively in east-west-direction
142/169	Sun-dials on a vertical plane in an arbitrarily chosen direction
143/170	Sun-dial on the plane of a roof
