Litera consonans palatalis est: Formatur cum vocali E preposita, allisione extreme lingue ad palatum, ut
 sonus uno syllaba tono ad latera lingue effluat. Polonis differentia quadam huius est consonantis qua enim cum linea
 transversa pingitur, rancō quodam sonō, tanquam diphthongo ð intra concavum oris resonante, dum lingua palato ad-
 haret, illis pronanciatur. Græcis λ Lamda bysillabica vox est, ut & ceteris Orientalibus.
