

Formæ stellarum.	Longit.		Latit.		Mag.
A R G V S.	par.	scr.	pa	scr.	
in medio scuto fulgens	89	40	47	15	4
in scuto trium præcedens	88	50	49	45	4
in angulo	92	40	49	50	4
in sibia trium	91	40	49	15	4
in extremo gubernaculo	97	20	49	50	4
in carina puppis duarum borealis	87	20	53	0	4
in australis	87	20	58	30	3
in folio puppis borealis	93	30	55	30	5
in eodem folio trium præcedens	95	30	58	30	5
in sibia	96	40	57	15	4
in angulo	99	50	57	45	4
in sibia sequens in transtro	104	30	58	20	2
in transtro hac duarum obscurarum præcedens	101	30	60	0	5
in angulo	104	20	59	20	5
in transtro dictam fulgentem duarum præcedens	106	30	56	40	5
in angulo	107	40	57	0	5
in scutulis & statione mali borea trium	119	0	51	30	4 mag.
in sibia	119	30	55	30	4 mag.
in australis trium	117	20	57	10	4
in medio his duarum coniunctarum borealior	122	30	60	0	4
in australiior	122	20	61	15	4
in medio mali duarum australis	113	30	51	30	4
in borea	112	40	49	0	4
in summo veli duarum antecedens	111	20	43	20	4
in angulo	112	20	43	30	4
in medio tertia quæ sequitur scutum	98	30	54	30	2 mi.
in sectione instrati	100	50	51	15	2
in inter remos in carina	95	0	63	0	4
in angulo quæ sequitur hanc obscura	102	20	64	30	6
in angulo quæ sequitur hanc instratione	113	20	63	50	2
in angulo ad austrum magis infra carinam fulgens	121	50	69	40	2
in angulo sequentium hanc trium antecedens	128	30	65	40	3
in sibia	134	40	65	50	3
in angulo sequens	139	20	65	50	2
