basis angulum obtusum respicientis. Ad media duorum laterum duas rectas lineas dirige [illegible]

[illegible]

Circa trigonum assignatum sive sit illud orthogonium sive ambligonium sive oxigonium circulum describere.

Per divisionem [illegible]

Intra quadratum assignatum circulum describere. [illegible]

Intra datum circulum quadratum describere.

Duabus diametris [illegible]

Circa propositum circulum quadratum designare.

Divisa [illegible]

Circa quadratum assignatum circulum describere. [illegible]

[illegible]

Duorum equalium laterum triangulum designare cuius duorum angulorum qui ad basim oppositi reliquo duplus existat. [illegible]

[illegible]

Infra datum circulum equilaterum atque equiangulum describere pentagonum. [illegible]

[illegible]

Circa propositum circulum pentagonum equilaterum atque equiangulum designare. [illegible]

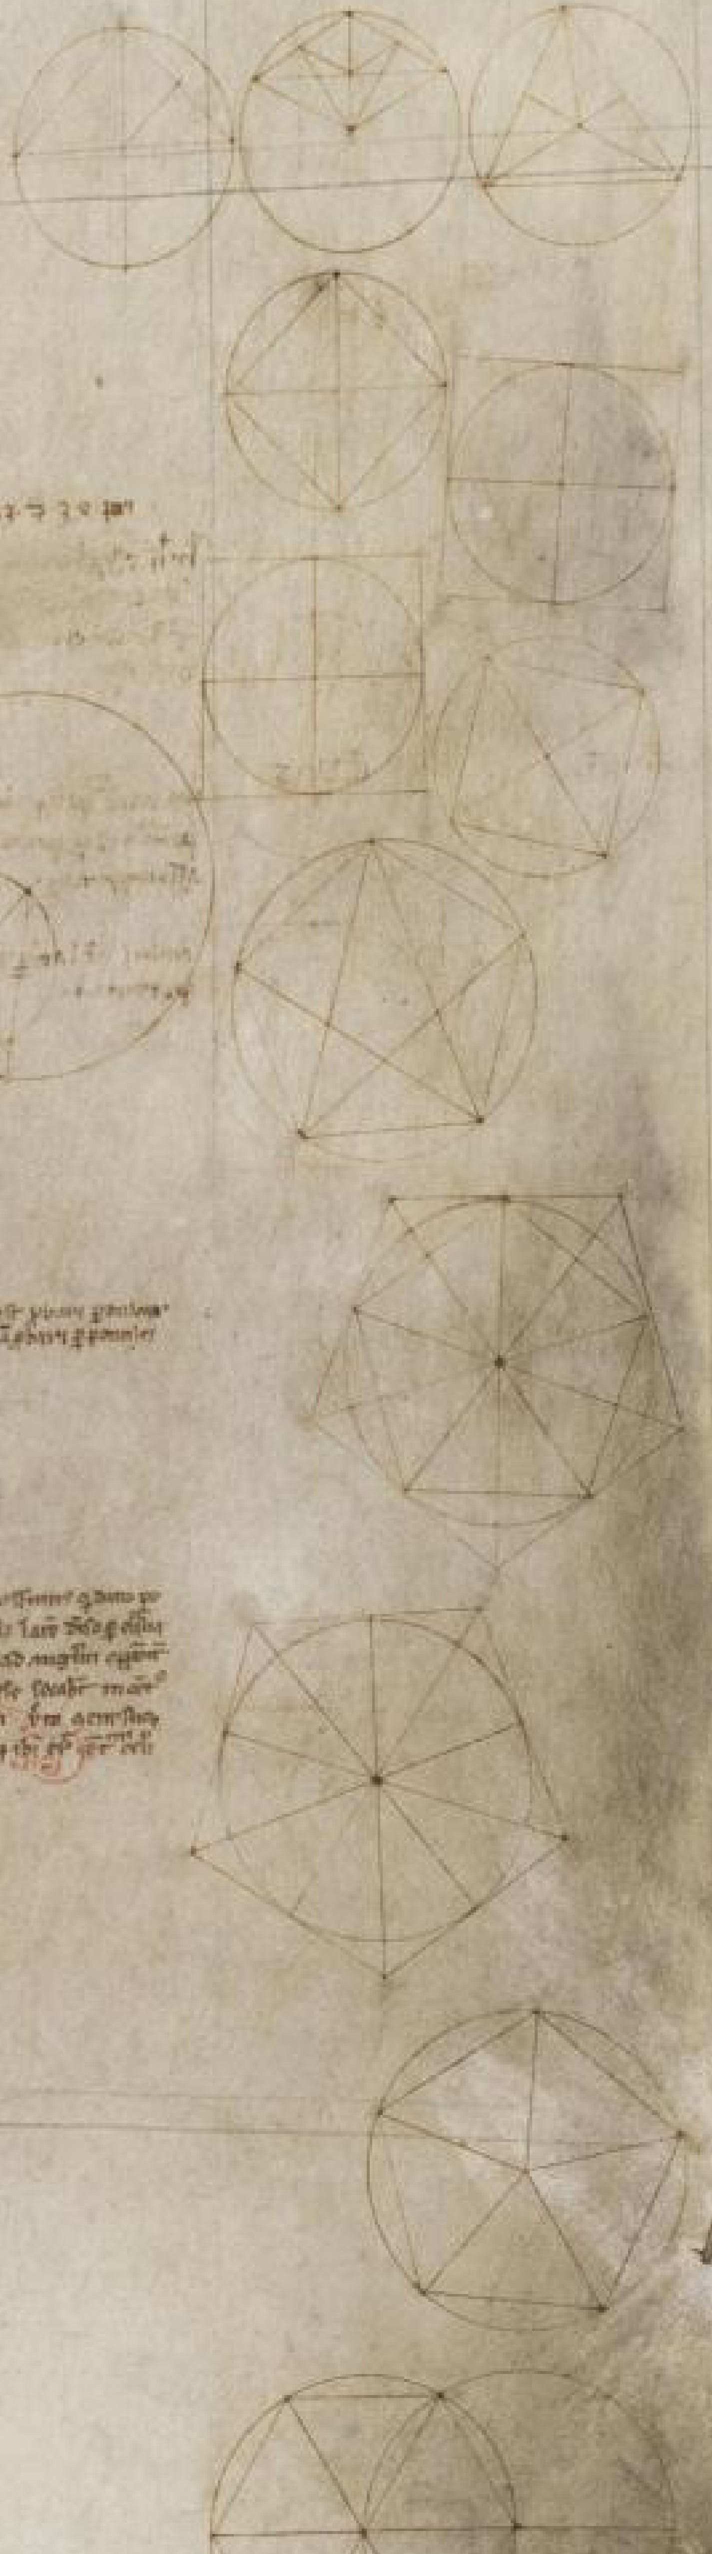
[illegible]

Intra pentagonum assignatum equilaterum atque equiangulum circulum describere. [illegible]

[illegible]

Circa datum pentagonum equilaterum atque equiangulum circulum describere. [illegible]

[illegible]

Intra propositum circulum exagonum equilaterum atque equiangulum describere. [illegible] latus exagoni equum [illegible] diametri dimidio [illegible]


[illegible]
